KEY INSIGHTS & OPPORTUNITIES

- **Brand demand:** Samsung and Apple lead product views and purchases in this October 2019 sample.
- **Cart-to-purchase:** The purchase-event-to-cart-event ratio is 80.18%; this measures events, not unique shoppers.
- **Optimization opportunity:** Investigate product categories and brands with high viewing activity but comparatively fewer purchases to identify potential conversion friction.

RECOMMENDED ACTION

Prioritize product-page improvements and checkout analysis for high-interest categories, then validate results using session-level conversion metrics.

KEY INSIGHTS & OPPORTUNITIES

- **Brand demand:** Samsung and Apple lead purchase-event activity in the October 2019 sample.
- **Cart activity:** Compare cart additions with purchase events to identify brands that may warrant closer conversion analysis.
- **Category opportunity:** Use the product-category slicer to investigate differences in purchase activity across categories.

RECOMMENDED ACTION

Prioritize product-page and checkout analysis for high-interest brands and categories. Validate conversion performance using session-level data before making marketing or inventory decisions.
